Mrs. Deepti Gupta
Mother Of Rounak gupta

Hi I am Deepti Gupta and my son Rounak Gupta is now a GATIKIAN as he has now taken admission in a wonderful college called GATIK.

I was very confused when I started to look for a really good college for my son and while browsing on internet I came across GATIK junior college, I did lot of comparisons online but got really tempted by the reviews of this college and then I started to dig and deep dive and it was a great experience from my 1st call itself as I received a call from Mrs. Vanita Khosla (the students services manager) who was very knowledgeable and had answer to every question I asked, the best part was in a 5min conversation she started to understand my son's requirements, she gave all the details very clearly, informed my son to take a psychometric test which will help him to analyse to pick the suitable group, he went ahead and it was really helpful as she gave a very detailed report which helped him to pick MPC with AI. After which when I asked for a discount she suggested me to let him earn a discount by attending a scholarship interview which was again a great experience as it was my son's first time and he made it, which really boosted his confidence and motivated him to achieve a lot more, thanks to all the faculties in the interview. Mrs. Khosla has proved that 1st impression is the best impression.

My son then started his online classes of 2 weeks which was a bridge course, he being interested in Commerce and coming from CBSE background was a bit hesitant to go for an Intermediate MPC course but just after his first class I could see lot of confidence in him, he is now very excited and loves to attend all the classes and all the credit for this goes to the amazing Faculties in both the branches (Kokapet & Tarnaka) and I strongly feel we should not look into the fancy college grounds and buildings, it's the inspirational teachers and support staff that makes GATIK a wonderful environment for our children to shine. I wanted my child to have stability, opportunities and focus on emotional wellbeing, I truly appreciate the high standard of education while still being affordable. Our son had a wonderful start to his college experience and the faculties have been very instrumental in providing such a nurturing and exciting learning environment.

We also had an online orientation program which was led by the CEO and Founder Mr. Kodali and the Principal Mr. Avinash Reddy, it was an amazing session where every faculty participated, they all went into details of each subject and made this session very informative, we were told about student's schedule, field trips, IPE Board exams and entrance JEE exams coaching, lot of time was given to parents to ask questions and all were answered and this session helped us to evaluate yes this is what our son wants. Overall, it was an amazing session and made us feel very confident, now we feel our son's future is in safe hands.

GATIK (mean progression) and this college is clearly living up to the meaning of it, as this college provides the support and education that I would want for my child. It has a caring environment that nurtures and encourages them in a variety of ways.

I would absolutely recommend this college to others and feel pleased to have found the place that suits my son's nature and needs.

I am very confident that my son will be really matured and get transformed from a student to a young adult in his 2 years of college at GATIK as this college has amazing sessions called BTC (Beyond the classroom) in which he will learn not just the education skills but many other skills like Business, Leadership skills, trust, integrity, values and many other skills which are required in a workplace.

So, don't wait just go ahead as your child will have a bright future if he/she also becomes a GATIKIAN.
